Flat No 132-122/2, 8th lane Dwaraka Nagar, Nagaralu, Guntur 522007 - AP (Open to Bengaluru)

PROFESSIONAL SUMMARY

Detail-oriented Computer Science undergraduate with hands-on experience in Full-Stack Development and Generative AI / RAG architectures. Proficient in building robust REST APIs with FastAPI and Node.js/Express, creating responsive frontends with React, and managing MongoDB databases. Demonstrates strong problem-solving skills, solid understanding of Data Structures & Algorithms, and rapid adaptability to collaborative engineering environments.

ACADEMICS

Qualification	Institution	Examining Body	Score	Year of Passing
B.Tech	R V R & J C College of Engineering, Guntur	Autonomous	7.13	2027
IPE / 12th	Narayana Junior College, Kurnool	Board of Intermediate Education, Andhra Pradesh	87%	2023
SSC / 10th	Good Shepherd English Medium School, Nandyal	Board Of Secondary Education, Andhra Pradesh	6.7	2021

TECHNICAL SKILL SET

- **Programming Languages:** Python, Java, C, JavaScript.
- **Backend Technologies:** FastAPI, Node.js, Express.js, RESTful APIs, JWT Authentication.
- **Frontend Technologies:** React.js, HTML5, CSS3, JavaScript (ES6+).
- **AI & Generative Tools:** Retrieval-Augmented Generation (RAG), LLMs (Ollama / OpenAI), FAISS, Vector Embeddings.
- **Databases:** MongoDB, NoSQL Schema Design.
- **Developer Tools:** Git, GitHub, VS Code, Postman, Docker.
- **Core CS Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Systems.

PROJECTS

Context-Aware Retrieval Augmented Generation (CA-RAG) [Project Link]

Tech Stack: Python, FastAPI, React, FAISS, MongoDB, Ollama/OpenAI, Docker | Academic / Hackathon

- Engineered a full-stack context-aware RAG system using FastAPI and React to query multi-document PDFs with hallucination detection and context consistency validation.
- Designed a high-performance vector retrieval pipeline using FAISS embeddings, dynamic chunking, and query rewriting to maximize semantic precision.
- Implemented secure user access using JWT authentication with bcrypt and containerized the microservices via Docker for scalable deployment.

Secure Authentication & User Management System [Project Link]

Tech Stack: Node.js, Express.js, MongoDB, JavaScript, HTML5/CSS3 | Self-Project

- Developed an end-to-end user authentication platform implementing secure registration, hashed password verification, and session management.
- Architected MongoDB database schemas for efficient credential storage and data indexing, preventing unauthorized access attempts.
- Constructed a responsive, clean frontend interface with real-time client-side and server-side validation feedback.

CERTIFICATIONS

- **Public Speaking**, from NPTEL [October 2025]
- **Human Computer Interaction**, from NPTEL [April 2026]
- **Quantum Fundamentals**, From Wiser [February 2026]

SOFT SKILLS

- Problem Solving & Analytical Thinking, Technical Communication, Team Collaboration, Time Management & Adaptability.
